

Boutique consultancy

SAP & AI

Company profile 2026

The new way
to know why.

Milano · nowy.it

N

O

W

Y

A solid SAP core. AI inside the processes.

SAP at the centre, artificial intelligence inside the processes, senior people from the first meeting to go-live.

SAP and AI. One senior team.

Enterprise boutique consultancy based in Milano, founded in 2024. SAP core, AI agents inside the processes, full accountability for the outcome. Projects across Europe, MENA and APAC.

Figures refer to the team's combined experience, including before NOWY was founded.

120+

SAP programmes led by the team across their careers

14

Years of average SAP experience

38+

AI releases in production delivered by the team

3

Regions served: Europe, MENA and APAC

Three practices. One architecture.

01

SAP Consulting

S/4HANA · Business Partner · SAP Grow · BTP

SAP advisory and delivery, from design to go-live: a core built to last.

S/4HANA brownfield and greenfield
Business Partner and data quality
SAP Grow on S/4HANA Cloud Public
Clean Core and BTP extensibility
HR portals and SuccessFactors
Data migration and takeover with AI agents

02

Generative Intelligence

AI Engineering · Joule · Claude · RAG · Agents

AI inside the ERP: a control layer over the processes that already exist.

Joule and SAP AI Foundation
RAG and vector search
Custom LLM apps on BTP
Agents and process automation
MCP connectors for SAP and M365

03

Innovation Management

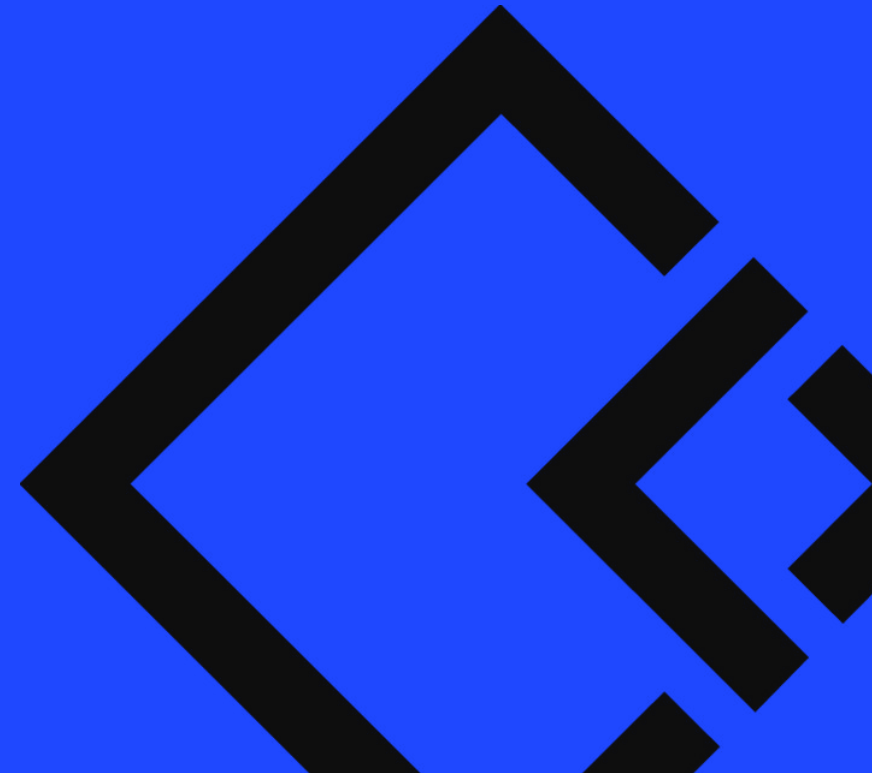

Advisory · Roadmap · AI CoE · Operating model

From first idea to industrial scale: answers for those who decide, clarity for those who build.

Roadmap and business case
AI Center of Excellence design
Operating model and talent strategy
Board-level programme assurance

AI in production. Inside SAP, every day.

Agents and chatbots connected to SAP, Microsoft 365 and the client's systems: reading the data, preparing the transactions, executing after a person approves.

AI agents inside SAP.

A person has the final say.

1 People Chat, Teams, portal, e-mail	2 NOWY agent Reasons, plans, uses the tools	3 Systems S/4HANA · BTP · M365 · third parties	4 Approval Human-in-the-loop on every write
--	---	--	---

■ Finance close agent

Reconciliations, accruals and proposed postings on S/4HANA: the team approves, the agent posts.

■ AP & invoices

Reads invoices, matches orders and goods receipts, prepares the posting, flags exceptions.

■ CFO copilot

Revenue, aging, cash and backlog in natural language, straight from SAP data.

■ Employee and customer chatbots

HR self-service, tickets and order status on portals, Teams and web, with Joule or Claude.

■ Integration agent

Monitors CPI flows, diagnoses errors and proposes the fix before the ticket.

■ Operations agent

From document to data: OCR, deliveries, delivery notes and actuals with nothing re-keyed.

Built-in guardrails read-only by default · role-based permissions · audit log of every action · costs and models under control · data within the client's perimeter

DATA TAKEOVER

Data migration and takeover. Written and checked by AI.

AI agents that read the source systems, map, cleanse and load the data into S/4HANA, with automatic reconciliation and team sign-off on every batch.

MASTER DATA TAKEOVER

Customers, suppliers, Business Partner, materials, assets

BALANCES AND HISTORY

Open items, account balances, transaction and document history

MAPPING AND CLEANSING

Code mapping, deduplication, normalisation, validation rules

LOAD AND RECONCILIATION

Cockpit templates, APIs, agent-generated load files

Everything once written or re-keyed by hand goes to the agent: conversion programs, load files and reconciliation reports, reviewed by a person before go-live.

Results measured in production.

-42%

Close cycle time

ENERGY · 2024-26

S/4HANA for a European energy utility

Brownfield across 18 sites, Business Partner harmonisation, finance backbone modernisation.

-68%

Ticket resolution time

PROFESSIONAL SERVICES · 2025-26

SuccessFactors and HR portals for a global firm

Two third-party HR portals integrated, SSO for 14,000 employees, Joule-assisted self-service.

+34%

Throughput

MANUFACTURING · 2024-25

SAP Grow and shopfloor AI for a manufacturer

S/4HANA Cloud Public across 11 plants, RAG agents on Datasphere: exceptions resolved in minutes.

NOWY Labs.

Ready from day one.

Proprietary assets with built-in AI, live in a few weeks: they speed up the project and stay with the client.

Trackio

PROJECT & JOB OS

Jobs, progress, hours and margins in a single system.

Vervalo

COST MANAGEMENT

Budgets, orders, variations, progress billing and forecast, with an AI agent.

NOWY Logistics

OPERATIONS CONTROL

From manifest to invoice: OCR, routes, GPS, delivery notes, actuals.

Integration Monitor

SAP BTP · SAPUI5

CPI errors, JMS queues, certificates and S/4 reconciliations.

SAP CFO MCP

AI ON S/4HANA CLOUD

CFO reporting in natural language, read-only.

NOWY Agent

AI ENGINE

The assistant that plugs into every NOWY app.

Financial Analyzer

FINANCIAL ANALYSIS

PDF/XBRL, deterministic KPIs and red flags, ready-made reports.

NOWY Control

AI GOVERNANCE

Agent spend, quality and actions, client by client.

Enterprise depth. Boutique speed.

01

Senior, always

Those who design also deliver: senior counterparts from kickoff to go-live.

02

Native SAP and AI

One team for the SAP core and for the agents working inside it.

03

Ready accelerators

NOWY Labs products: every project starts from a base already in production.

04

Measurable results

Business KPIs set at the start and measured in production, programme by programme.

05

Long-term partner

Alongside direct clients, system integrators and consulting firms, on the front line or inside your team.

06

International reach

Based in Milano, projects across Europe, MENA and APAC, with the responsiveness of a small team.

From discovery to lasting adoption.

01

Listen

Discovery, interviews, landscape analysis. Ambitions and constraints clear before drawing a single line.

02

Frame

Architecture, business case, sequencing. A plan that stands up in the boardroom and in the technical review.

03

Build

Implementation, integration and AI, led by senior practitioners.

04

Sustain

Adoption, governance and continuous evolution: a system that keeps delivering.

Human-in-the-loop. Every AI output is validated by a person before production. Incremental releases, value at every step.

S/4

One technology perimeter. From the SAP core to AI agents.

CORE ERP

S/4HANA Cloud Public and Private • SuccessFactors • Grow

PLATFORM AND DATA

SAP BTP • Datasphere • Integration Suite

AI AND AGENTS

Joule • SAP AI Foundation • Claude • MCP connectors

COLLABORATION

Microsoft 365 • Teams • SharePoint

Single direction by the team across the whole stack: data within the client's perimeter, permissions inherited from SAP, audit of every action.

Thirty minutes on your why.

One meeting to find where SAP and AI deliver the most in your processes.
